Carson hotel

42 Days | 00 Hours | 00 Minutes

The Carson Hotel at Mars. Like a lot of off-world businesses, Burlington Intergalactic made their first step with orbital hotels.

Using that success as a stepping-stone, naturally the next move would have to be Mars.

The most popular package was a week-long all-inclusive stay at the Carson resort and a hike up the tallest mountain in the solar system: Olympus Mons.

Rided by mechanical sherpas and powered space suits, the climb takes approximately 30 minutes.

It's a very time-efficient way to prove your masculinity, but still not as badass as killing a lion.

All of this was overshadowed by the presence of Becky Burlington, daughter of Wayne Burlington, and heiress to the Burlington fortune.

Recently she had been in the spotlight because of her out-of-control party lifestyle and multiple drug arrests. In an effort to clean up her image, she had taken a vacation to Mars.

While the media had expected her presence on Mars to be punctuated by the same stories of drug binges and party-girl antics... nobody had heard from her in

WHO WOULD WANT TO PLAY THIS GAME IT SUCKS!!!. It scratched my Solus itch. At least for the 4.2 hours it took to finish. Story was good, graphics were nice, everything ran smooth (asych on). Good stuff. Growing and shriking in vr was pretty neat.. Pros:

Lots of pawtential
Great background mewsic
Purrfect art style

Cons:

Not called "2 Fast 2 Furry". One of the best RTS (with some rpg elements) in the history.

- 1) It was So much potential and deep story
- 2) so beautiful and tasty looks, graphics
- 3) very smooth and flawless mechanics, physics

It was really nice playing this game and it felt so unique!

Back then it was very high quality... just with very bad planned ad campaign with commercial failure as a result.

Forever in our hearts! 10/10. Wish they make a sequel.. Worms has always held a very strong position in my opinion. It wears it's heart on it's sleeve: It isn't an A-List game and it isn't for everyone. But for me, it's one of the most passionately developed game series ever.

Things have certainly moved on since the side-scrolling invertibrate slaughter-fest of the first games to the 3D variants of the game. And whilst I did love the 2D games, I have to admit that I prefer the 3D versions. Ultimate mayhem combines the best bits of two great titles: Worms 3D and Worms 3: Mayhem, keeping all the best bits from both and removing the bad.

The customisation is absolutely fantastic: Worms with Pope hats and 3D glasses shooting bazookas at Worms with Bunny ears and disco glasses has to be one of the most hilarious things in gaming.

As I said before, it's turn-based nature and sometimes fairly difficult missions are not for everyone. But if the thought of carnage, explosions, flying sheep bombs, alien abductions, an endless array of hats and voices, air-strikes and a huge concrete donkey even makes you smile, then perhaps you should give this game a look.

You won't regret it.. I like this game it show deep protencial of the game but Why you not update it? Please keep update and add more content in the game.

CONSTRUCT ADDITIONAL PYLONS.

Yeah, this is a game you can win by zerg rushing every time.

A half-decent mobile game badly ported to PC, as aggravating as enjoyable, with cutesy graphics and a completely dead multiplayer. (Sucks that 4 of its 11 achievements are based on winning multiplayer matches, though it only takes one for 2 of them.) Some problems are the port, but some are just built in.

The only way this game could be more casual is being pay-to-win (no freemium, yay), with its bright cheery graphics, easy money, and small levels that only take a dozen rounds each with little strategy. Although the day/night cycle SHOULD offer a game-changing twist, the water/ice is just an occasional convenience, and almost every single-player level can be easily won by zerg rushing the enemy. The AI isn't very strong, and the first player has an almost insurmountable advantage thanks to the order battles occur. There's zero randomness, zero specials, and once you know the units you can quickly min-max the game and win everything. A 4X player will find almost no depth here.

And yet I think it's kind of cool. It gives some random casual iPhone-like entertainment in between meatier games, and making tons of units and wiping out everything can be surprisingly cathartic. I just wouldn't pay much for it.

I wish it had been fully made for the PC, because so many things require you to sweep your mouse from one end of the screen and back just to give orders. It's ok for a touchscreen, though it'd still have some issues there, but a pain in the ass with a mouse. Aside from that, having no way to cancel an accidental order is annoying, the music sometimes skips, and the text and animations are interminable. No option menu at all.

Wait for a sale and give it a go. It's no Highborn, but it might amuse you.. incredibly wholesome . hope my pets dont refer to me as mistress though. Wow, do NOT buy this full price. Only get it on a sale and honestly you aren't missing anything if you pass on it. (in fact you probably should) Took me 16 minutes to play, only two small fights, no valuable story content.. Tower defense with fog, and bonus challenge maps.

Terrible acting, pretty graphics, you know, we've seen it all before.

[Rating: 65/100]. An orbital salvage and destruction game, I found it somewhat likable, but most of all just a pain to control. Must not be a game made for me...
